

# Trish

Bay of Plenty

## Experience

I have been involved with childcare as an Educator for many years and could not imagine doing anything else. I believe in a home away from home and provide a large natural outdoor environment that is grassed and shaded with mature trees and flowers and very relaxing.

## Home Environment

Trish provides a safe environment where all children are treated equally and are nurtured. Trish has a safe and secure back yard that is open planned. There is opportunity for children to challenge themselves with the swing and slide set, balls and often water and messy play. Inside you can find a basket full of fun and resourceful activities allowing for children to be creative and expressive and to develop and strengthen their skills further.

## Childcare Philosophy

Trish is very passionate about Early Childhood Education. She provides a safe environment where all children are nurtured and loved. With established routines which are similar to their home routine, children can be themselves and have fun learning valuable skills and develop confidence, while providing consistent firm and fair. Trish has an open door policy, supports each child and families values and cultures and brings them all together.

## **Community Involvement**

---

Trish is an active participator in the community and is often seen out exploring the range of community events that are offered. This includes, but are not limited too, gymnastics, music groups, play dates and nature walks.
